

# Workshop:

## Responding to Planning Applications

November 2017

EXETER  
**CYCLING**  
CAMPAIGN

# What are we aiming for?

# What are we aiming for?

- A better city for all
- Comprehensive, convenient and connected cycling infrastructure, with every street safe to cycle for all ages and abilities (AAA)
- Cycling the safe, natural choice for a large proportion of everyday journeys.
- Cycling as part of the response to congestion, pollution, physical inactivity and population challenges.

# Why we respond to planning applications

Exeter Cycling Campaign scrutinises planning applications to see if the proposed development:

- Provides a safe environment for people walking and cycling;
- Uses good urban design to make walking and cycling the most convenient and attractive way to travel;
- Provides essential infrastructure like cycle parking;
- Allows for growth in the number of people walking and cycling so the development will stand the test of time;
- Conforms to adopted plans and strategies on sustainable transport and cycle infrastructure

# The Planning System - What We'll Cover

- Exeter City Council & Devon County Council roles
- The Planning Process
- How to respond to a planning application
- Case Studies
- Helpful Resources

# Who is responsible for what?

- **Exeter City Council** - The 'Local Planning Authority' (LPA).  
Responsible for looking at all aspects of a proposal and deciding whether permission should be granted.
- **Devon County Council** - The 'Local Highway Authority' (LHA).  
Responsible for looking at only the highways and transport elements of a proposal and making a recommendation to the LPA.

# The planning process in 4 simple steps

- **Pre-Application** - The developer (or 'applicant', to use the jargon) approaches Exeter City Council (ECC) to discuss their proposals. ECC advise the developer of any concerns, suggestions or requirements they have. Discussions may also be held with Devon County Council (DCC) highways team.
- **Submission** - The developer submits a planning application to ECC, which checks the paperwork is correct ('validation') and assigns a dedicated 'Case Officer'.
- **Consultation** - The Case Officer invites the public and consultees (including DCC) to comment on the proposals for a period of 21 days (3 weeks) from the date a valid application was received.
- **Determination** - The Case Officer assesses the application against the Local Plan, taking into account consultee comments, national policy and any amendments proposed by the developer. The application is either decided by the Case Officer ('delegated decision'), or by ECC's elected planning committee, based on the Case Officer's recommendation.

# How do you find a planning application?

To find an application on Exeter City Council's website, you have two options:

- The Weekly List (updated every Thursday) - <https://exeter.gov.uk/planning-services/permissions-and-applications/weekly-planning-list/>
- The Search Page (search anytime by Map, address or application number) - <http://publicaccess.exeter.gov.uk/online-applications/>

# How do you find a planning application?

### 2. 10 November 2016

The following applications have been received. Copies can be viewed at the Customer Service Centre, Civic Centre, Exeter, please call 01392 265223 to arrange a time for viewing.

You can also **view applications online** by visiting our Search Planning Applications page or by **clicking on the application number below**. Please be aware that some will appear online shortly.

Letters of **objection, comment or support** must be made **in writing or by email** to the stated case officer before the Earliest Decision Date shown on the Application Details screen.

DEVELOPMENT AFFECTING THE SETTING OF A LISTED BUILDING (LB) AND/OR THE CHARACTER OR APPEARANCE OF A CONSERVATION AREA (CA)

**60 Haven Road.** Variation of condition 7 to allow recorded background music (Planning Reference 15/0707/03). [16/1198/03 \(LB & CA\)](#)

**The Bungalow, Mount Wear Court, Countess Wear Road.** Single storey extension. [16/1347/03 \(LB\)](#)

**28 Higher Shapter Street.** Proposed new first floor window on east elevation (to serve new shower room). [16/1342/03 \(CA\)](#)

**Former Richards Aquatics, Market Street.** Change of use from A1 to temporary night shelter (*Sui Generis*) until end of March 2017. [16/1376/03 \(CA\)](#)

**31-32 Southernhay East.** Formation of opening in rear wall to provide emergency escape route. [16/1307/07 \(LB & CA\)](#)

**9 Vyvyan Court, Fore Street, Heavitree.** Single storey side extension. [16/1178/03 \(CA\)](#)

**Bathurst House, Smythen Street.** Lime rendering with a smooth finish to South West elevation. [16/1178/03 \(CA\)](#)

Click the week you want.  
Applications validated by ECC in that week will appear.

# Responding to applications

Start with the big picture. Think about:

- Where the development is;
- What the existing roads, footpaths are cycle routes are like;
- Who uses these routes, and how many (i.e. a lot, or not very many?)
- Who is going to use these routes once the development is built?
- Where are all these people going?
- What impact (positive or negative) will the proposed development have?
- How could the proposed development be improved?

*You don't need to include all of these in your response! They are just to help you identify the key issues.* Once you have identified the 'big picture' issues, pick a few to elaborate on. Set out the issue, and if possible, suggest how the proposals could be improved to address the issue. Being **positive** and **constructive** usually yields better results.

# Case Study 1: Sandrocks, Gipsy Hill Lane, Exeter

- 61 homes;
- Main site access from Pinn Lane;
- A pedestrian and cycle access from Tithebarn Way;

61 homes proposed  
within the red line.

- Devon County Council closed Pinn Lane to traffic at the junction with Tithebarn Way in 2014. This was to reduce traffic on the lane and its junction with Gipsy Hill Lane and Hollow Lane;
- Pinn Lane is used by commuters walking to work from Pinhoe;
- Gipsy Hill Lane and Hollow Lane are part of the E3 and E4 'Strategic Cycle Routes';
- The new 'two way' section of the E4 route is under construction on Cumberland Way;

Above: Junction of Pinn Lane, Gipsy Hill Lane and Hollow Lane (key node on E3/E4 cycle route)

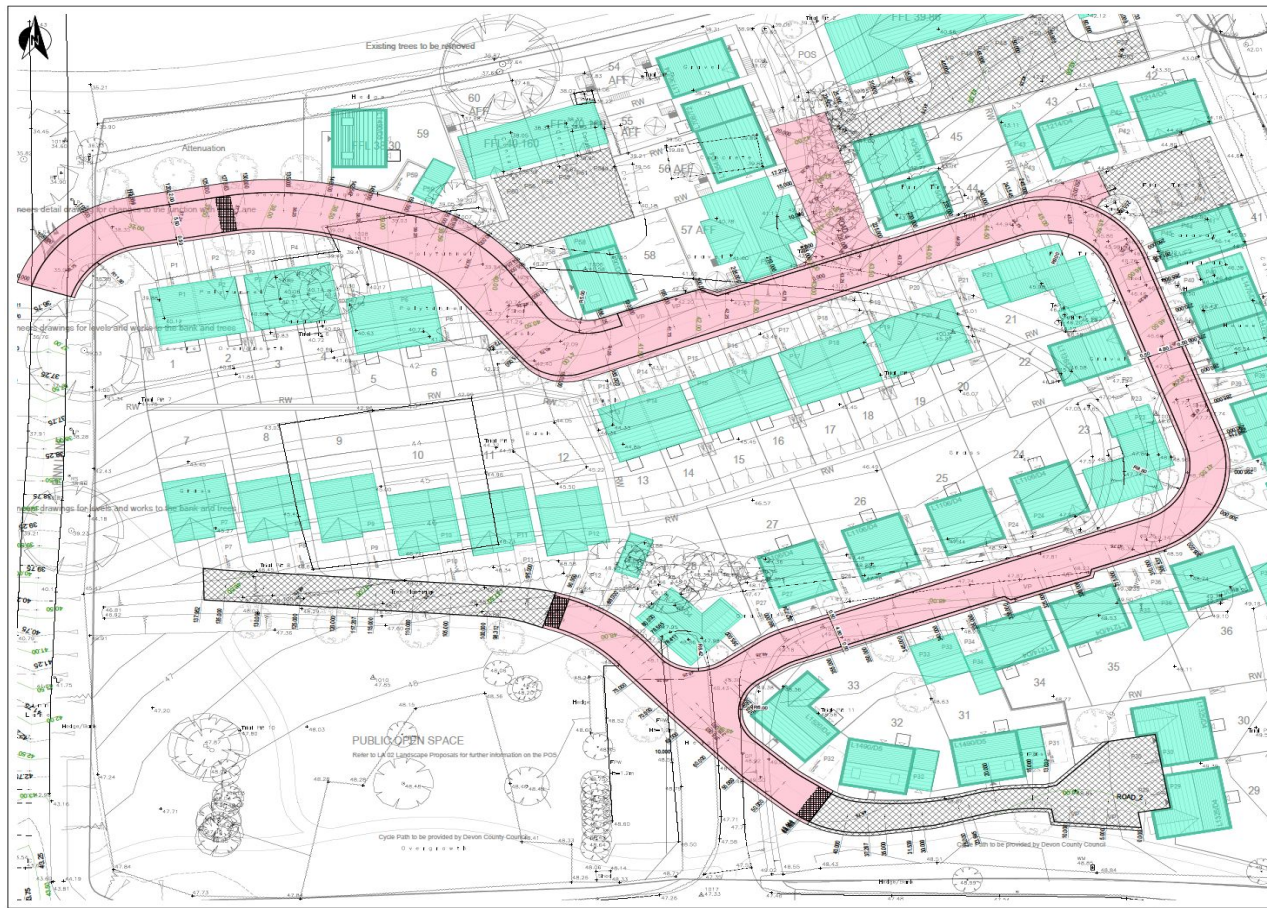

Left: Pinn Lane, looking south towards the junction

Left: The junction of Pinn Lane and Tithebarn Way, with access for people walking and cycling only.

This is the proposed layout and design. Look for:

- **Footways** (i.e.pavement) and **cycleways**. Are there any? Or is there one path to be 'shared' by pedestrians and cyclists? If so, try to see if they meet these minimum Department for Transport standards:
  - Footway - 2 metres wide
  - 'Shared path' - 3 metres wide

If not, they should! Otherwise the space cannot be shared safely.

# The Campaign's Response:

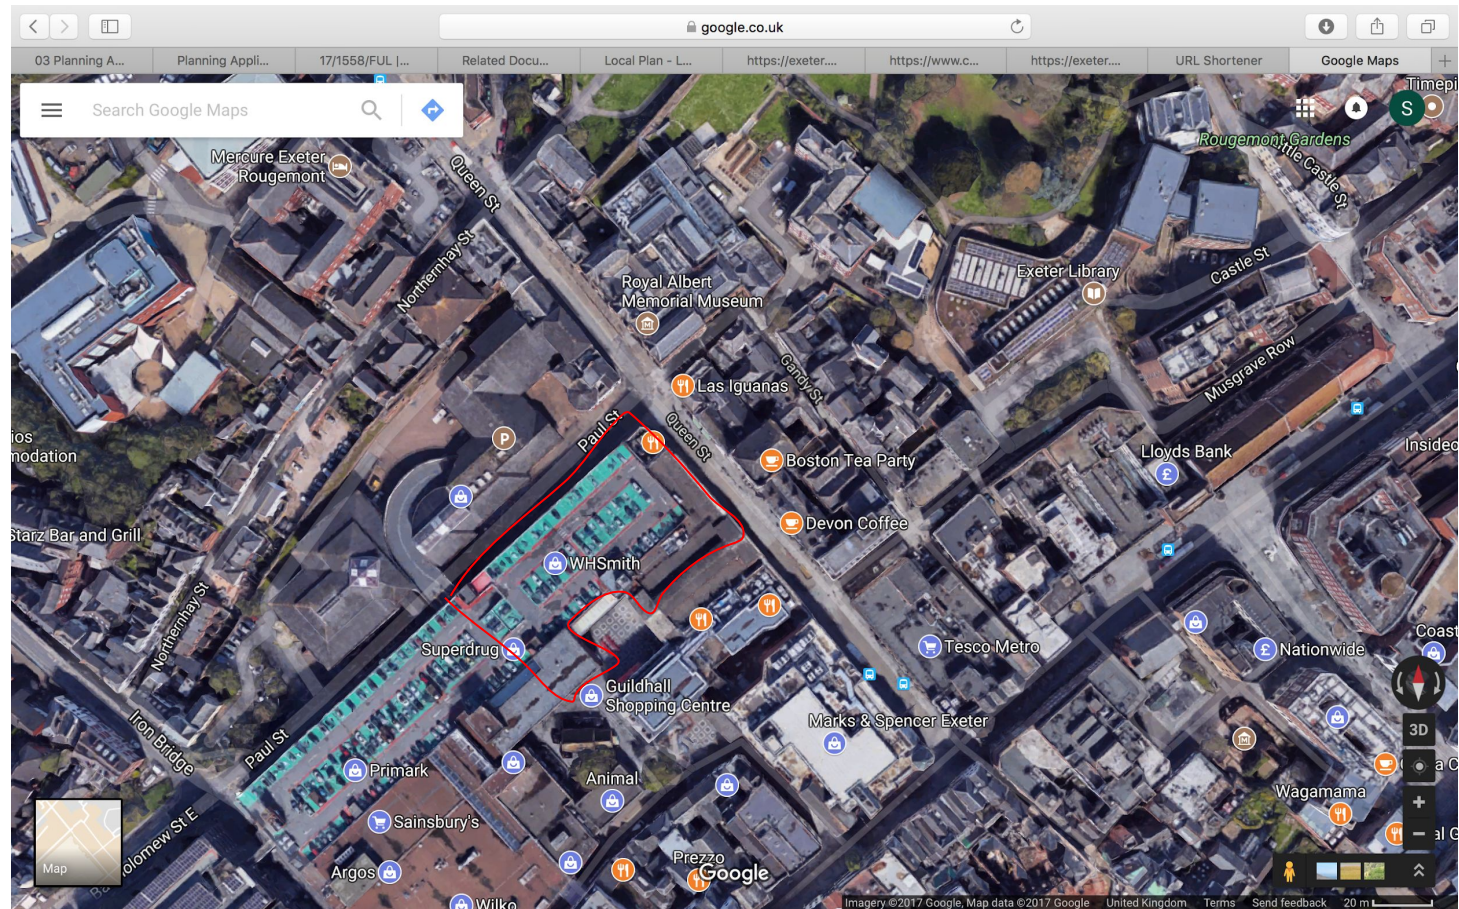

- Negative Safety Impact on Pinn Lane;
- Likely to discourage people from walking and cycling due to the increase in traffic on designated routes;
- Poor quality layout, with cars give priority over people walking and cycling at junctions.
- Alternative vehicle access via Tithebarn Way would be acceptable.

Full response here: [https://drive.google.com/file/d/0Bzjw-8v0RIH\\_aGFzbEJPUVF1RG8/view?usp=sharing](https://drive.google.com/file/d/0Bzjw-8v0RIH_aGFzbEJPUVF1RG8/view?usp=sharing)

# Case Study 2 Guildhall Shopping Centre Phase 2 Exeter

- Remodelling of WH Smith, the Coffee Pot and service areas with new shops, bars and a bowling alley;
- No changes to access arrangements;

Proposed Site Plan. Look for:

- **Cycle parking.** Is there any? If so, is there enough? If in doubt, refer to Table 2 of the Exeter Sustainable Transport SPD (or the rather wordy 'Supplementary Planning Document')

<https://exeter.gov.uk/media/1666/sustainable-transport-spd.pdf>

Is the **cycle parking** well located and of a high quality? Think about:

- Safety - is it in an area that is well overlooked? Hidden cycle parking increases risk of theft and is less likely to be used.
- Convenience - is it located as close as possible to where people are going?
- Shelter - if people are going to spend a while somewhere, they are more likely to use cycle parking that protects their bike from the rain.

If in doubt, refer to DCC Cycle Parking Design Guidance:

<https://www.traveldevontoolkit.info/resources/Cycle%20parking%20design%20guidance.pdf>

Think about **junctions** (where two thirds of all accidents happen - ROSPA, 2017).

- Do people walking and cycling have priority over cars?
- Are there safe and convenient crossings?
- Can people get from A to B easily, or do they have to take a detour?

# The Campaign's Response:

- Loss of cycle parking installed as part of Phase 1 unacceptable ;
- No extra cycle parking is being proposed;
- No consideration of the narrow pavements which will become even busier once the development is complete.

Full response: [https://drive.google.com/file/d/1yO-815mih1micZfQvHtTTezr7y\\_IEAiV/view?usp=sharing](https://drive.google.com/file/d/1yO-815mih1micZfQvHtTTezr7y_IEAiV/view?usp=sharing)

# Case Study 3: Clyst Road, Topsham

- 155 homes
- 64 bed care home

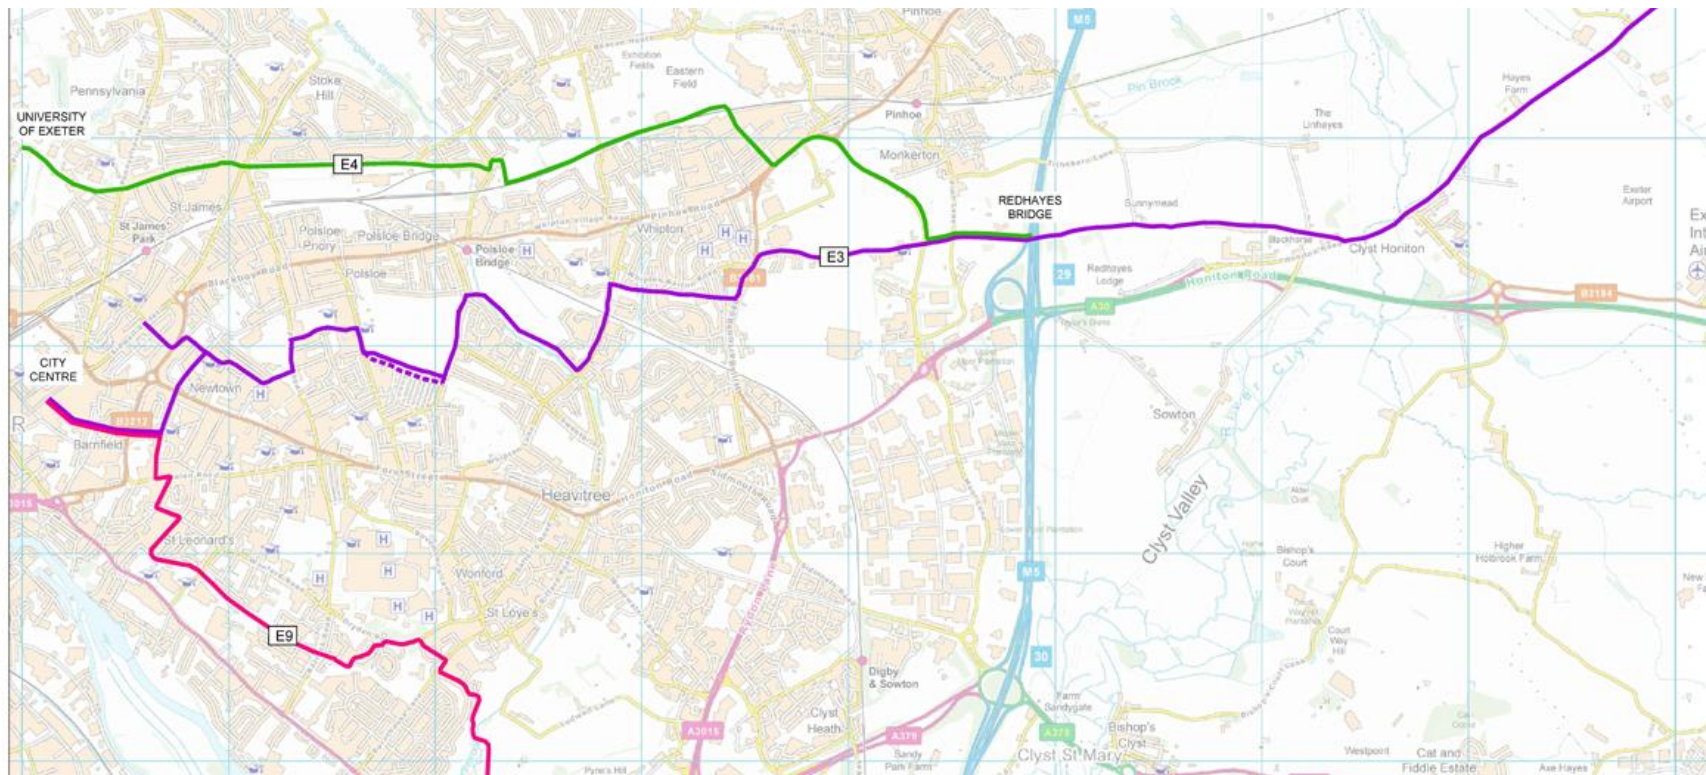

The Campaign's response:

<https://drive.google.com/file/d/0B1U8ETzpWByVcWdaWGO0RThSM2c/view?usp=sharing>

- London Cycling Design Standards (endorsed by the Department for Transport, the standards the Campaign is working to) - <https://tfl.gov.uk/corporate/publications-and-reports/streets-toolkit#on-this-page-2>

# Helpful Resources: Design Guidance

## London Cycling Design Standards (LCDS)

Comprehensively revised and updated in 2014, LCDS sets out requirements and advice for cycle network planning and for the design of dedicated cycle infrastructure, cycle-friendly streets and cycle parking. This guidance applies to all streets in London and must be adhered to for relevant funding programmes. In October 2016, minor updates were made to the document, for consistency with the revised Traffic Signs Regulations and General Directions (2016).

### [Chapter 1: Design requirements](#)

PDF 1.74MB

### [Chapter 2: Tools and techniques](#)

PDF 1.57MB

### [Chapter 3: Cycle-friendly streets and spaces](#)

PDF 4.80MB

### [Chapter 4: Cycle lanes and tracks](#)

PDF 9.42MB

Remember - you don't need to get too technical (the Campaign's got that covered). Personal experience, insights and suggestions are valuable. Just stay calm, concise and constructive.

Finger pointing, profit bashing and excessive use of **Bold**, CAPS-LOCK and !!!!!!!! will detract from the one argument that matters: the need for development to deliver the best environment possible for people walking and cycling.
