

M153 20/1187/FUL - Exmouth Junction Gateway Site Land Off Prince Charles Road Exeter EX4 7EE

Exeter Cycling Campaign is pleased to note the sustainable transport aspects of this application and that secure and covered cycle spaces would be provided for residents and visitors. The Design and Access Statement section 8.1 proposes 60 internal cycle spaces and 42 external spaces - 12 sheffield stands and 30 covered secure spaces. This should at least comply with the minimum standards set out in Exeter City Council's Sustainable Transport Supplementary Planning Document Appendix 1. Cycle storage should conform to the security standards recommended by Devon & Cornwall Police. The cycle spaces should also be lit at night with vandal resistant fittings and energy efficient lights.

We also note that the footpath around the site would be widened to 3m to allow for cycle use and that the site is ideally located to make use of the E4 cycle route and connections.

Subject to the above we would support the application.
